

QuikScout Basketball

Coaches can catalog, organize, edit, and manage game or training videos with **QuikScout Basketball**. Whether you're scouting an opponent, making a highlight DVD for a team or player, creating a video yearbook or training athletes, QuikScout Basketball will benefit coaches and players.

- Customize QuikScout Basketball using your own terminology for faster sorting and editing
- Organize video clips based upon your own criteria such as motion offense, transition offense, or backdoor cuts
- Burn video clips to VHS or DVDs
- Email video clips to players and coaches or upload to websites

Give Your Team a Competitive Advantage With a QuikScout Basketball Scouting & Presentation System

"Quik Scout has made it quick and easy to provide hi lite DVDs for each player and to college coaches."

The software reduced my video editing time by at least 75% -- allowing more time on the court and less time editing and trying to find a particular play to show to the team.

The technical support that Quik Scout provides after the sale go above and beyond expectations."

Lance H. Watson
Athletic Director
Mens Basketball Coach
Fred T. Foard High School

QuikScout Modules

Call 800.251.4077 to schedule an on-line demo!

All QuikScout Modules allow coaches to mix and match features specific to their needs and budgets. Each Module allows coaches to use their own terminology while QuikScout custom data entry design features make for an affordable, easy to use video editing solution. Depending on your needs and/or budget, you can choose additional software modules.

Clipboard / Filmroom Module - \$495

With the Clipboard and Filmroom, making tapes is a thing of the past. Simply connect to a projector, bring in your players and present your film sessions from your computer.

Each play is represented by a thumbnail. You can view each play by clicking the thumbnail shown on the left side. You can also use the VCR like controls to fast forward, rewind or play each play. You can even run the play in slow motion or step through it one frame at a time.

Live Capture Module - \$495

Whether you're live at the game or recording films that you've exchanged with other teams, Live Capture allows you to record and scout your video at the same time.

If you're live at the game, you can get edits as soon as the game is done. If you're trading tapes, you can cut your time in half by capturing and scouting at the same time.

QuikScout Defense & Tutor - \$995 Team License

Create an interactive video scouting report that can include special notations for any situation in the game. Improve players' mental readiness by pairing specific video clips with questions and/or special notations about opponents' tendencies and game strategy. Upload the file to a secure web site or transfer it to a flash drive so players have easy access from their own personal computer.

QuikScout inMotion - \$195

QuikScout inMotion provides visual feedback for basketball players who want to master proper shooting technique. You can break down shooting motion frame-by-frame for immediate review and analysis.

" Quik Scout is great for the coach who is really serious about winning.

I use Quik Scout for game preparation of our opponents, to make recruiting DVD's for our players, and to review our own games. Our players are very well prepared because of Quik Scout.

It is easy to use and a very affordable option for video editing software that will give your team the edge in winning. "

QuikScout Player

Student Portfolio Manager

Create your own Video Portfolio! QuikScout Player software provides parents, coaches and athletes with the technology to create digital portfolios or video scrapbooks. Using the video editing features of QuikScout Player, an athlete begins by organizing his or her video highlights. Edited video, as well as digital images like JPGs and GIFs, can then be selected from QuikScout Player's portfolio

manager and sorted under specific "chapters" or headings.

After determining a title for each chapter or page, athletes can browse the portfolio manager to select photos or newspaper stories to combine with standard

college recruiting information. Video clips can also be combined with personal summaries that coincide with a video highlight.

By combining video editing software with portfolio design tools, QuikScout Player allows student athletes to create video scrapbooks of their high school careers. Once an athlete creates a personal electronic scrapbook (i.e. Video Portfolio), they can e-mail it to a college recruiter, burn it to a DVD, save it on a flash drive or upload the content to the Internet.
